

Devoirs week 4 / 5^{ème} A

Hello everybody,

I hope you are ok, respect the lockdown regulations and take good care of yourself and your family.

Here is a little homework for this week.

We are going to review the modals : should, ought to, must, have to, need ... + the negative forms of these.

Once more, you will write about your life during this time of lockdown.

- 1) I am sending **an exercise** to remind you what we did some time ago. You can find this document at school and on pronote. I focused on obligations.
I know you remember « should » and « ought to » that express the advice (le conseil).
Anyway you can check all this in your English notebook or ask me questions whenever you need.
- 2) Write **a list of 20 things** you must do, mustn't do, need to do, needn't do, have to do, don't have to do, should do, shouldn't do, ought to do... during this time of confinement and you compare with your daily routine on normal school time.

For example : During lockdown, I needn't wake up at 5.45 am **whereas (alors que)** on normal school time I must wake up early everyday.

Got it ?

One more example : During lockdown, I must work alone **whereas (alors que)** on normal school time teachers and classmates help me with my work.
